MISSOURI

HOLIDAY CRASHES

REPORT

Principal Staff Researcher:

Phyllis Emmel, Computer Information Technologist

MISSOURI STATE HIGHWAY PATROL STATISTICAL ANALYSIS CENTER 1510 East Elm Jefferson City, Missouri 65101 (573) 751-9000 x-2299

FOREWORD

This report is produced annually by the Missouri State Highway Patrol Statistical Analysis Center and Public Information and Education Division. It contains statistics on the State's holiday traffic crash experience. Each year Missouri law enforcement officials and other traffic safety authorities are faced with increased traffic safety problems during the Memorial Day, Fourth of July, Labor Day, Thanksgiving, Christmas, and New Year holidays. This report's findings can be used to develop better traffic safety programs designed for reducing the frequency and/or severity of crashes during these holiday periods.

Please take full advantage of the data contained in this report when developing traffic safety plans and programs for future holiday seasons. In addition, if you require other types of information services, the Public Information and Education Division of the Missouri State Highway Patrol will be glad to assist you.

JAMES F. KEATHLEY, Colonel

Superintendent

ACKNOWLEDGEMENTS

This publication was developed at the request of the Missouri State Highway Patrol Public Information and Education Division. Traffic crash data were obtained from the Statewide Traffic Accident Records System (STARS). The Missouri State Highway Patrol, Traffic Division, is responsible for coordinating the STARS program and maintaining the STARS central repository.

Special recognition is given to all Missouri law enforcement agencies and officers who provide traffic crash investigation services on Missouri's roadways and conscientiously report their findings to STARS. Due to their efforts, law enforcement authorities and other traffic safety officials are able to analyze their crash problems and address them through development of better traffic safety policies and programs.

The ability to analyze STARS data has been greatly enhanced, in part, due to the Missouri Traffic Records Committee. The Committee was developed to act as an advisory body to the Missouri State Highway Patrol for upgrading and maintaining the STARS system. Over the years, it has played an active role in improving the capabilities of this key traffic safety information system.

Finally, the U.S. Department of Transportation, National Highway Traffic Safety Administration, has allocated grant funds to the Missouri State Highway Patrol, Statistical Analysis Center, to provide statistical information services and develop publications, such as this report, for Missouri traffic safety authorities.

EXECUTIVE SUMMARY

The purpose of this report is to provide the Missouri State Highway Patrol (MSHP) and other State and local traffic safety authorities with information about Missouri's holiday traffic crash experience. The source of data used in this study was the Missouri Statewide Traffic Accident Records System (STARS). This report contains historical data encompassing the last five years of Missouri's holiday traffic crash experience with emphasis on the latest year (2007).

Missouri traffic safety authorities recognize holidays are an especially hazardous time for the driving public. From 2003 through 2007, one person was killed in a traffic crash every 7.7 hours in the State of Missouri. Over the holidays, one person was killed every 6.7 hours during the same five-year period. A total of 365 persons were killed over these holidays and 16,266 were injured.

- Over the Memorial Day holiday, 64 persons were killed and 2,802 were injured in Missouri from 2003 through 2007. In 2007, there were 1,094 traffic crashes in which 15 persons were killed and 474 were injured. One person was killed or injured every 9.6 minutes.
- Over the Fourth of July holiday, 56 persons were killed and 2,983 were injured from 2003 through 2007. There were 426 traffic crashes in 2007 in which 2 persons were killed and 230 were injured. One person was killed or injured every 7.8 minutes.
- Over the Labor Day holiday, 77 persons were killed and 2,769 were injured in Missouri from 2003 through 2007. In 2007, there were 1,107 traffic crashes in which 14 persons were killed and 537 were injured. One person was killed or injured every 8.5 minutes.
- Over the Thanksgiving holiday, 78 persons were killed and 2,957 were injured in Missouri from 2003 through 2007. In 2007, there were 1,572 traffic crashes in which 10 persons were killed and 572 were injured. One person was killed or injured every 10.5 minutes.
- Over the Christmas holiday, 40 persons were killed and 2,278 were injured in Missouri from 2003 through 2007. There were 1,857 traffic crashes in 2007 in which 8 persons were killed and 623 were injured. One person was killed or injured every 9.7 minutes.
- Over the New Year holiday, 50 persons were killed and 2,477 were injured in Missouri from 2003 through 2007. In 2007, there were 1,195 traffic crashes in which 10 persons were killed and 439 were injured. One person was killed or injured every 13.6 minutes.

INTRODUCTION

This report is one in a series which present data identifying the magnitude, severity, and characteristics of traffic crashes occurring over holidays in Missouri. The findings described in this report are based on five years of the State's holiday traffic crash experience (2003 - 2007) with special emphasis on the last year (2007).

Missouri traffic safety authorities have expressed an interest in studying holiday traffic crashes. Travel patterns change for many persons during these time periods. In many instances, persons take long trips at the start of the holiday and return on the last day. The volume of traffic on interstates and other major arterials having high speed limits dramatically increases during these time periods creating or magnifying congestion on these roadways.

In addition, many holiday time periods start at the end of a full workday after which drivers take long trips. Fatigue, resulting from lack of rest, as well as rising expectations of reaching destinations, no doubt reduces defensive driving abilities and increases the likelihood of committing driver error, such as speeding. In addition, holiday travelers making the return trip may experience similar problems due to their heavy involvement in recreational or other activities.

Recreational activities increase over holiday periods, along with consumption of alcoholic beverages as well as other types of intoxicants. This heavy consumption increases the chance of serious traffic crashes occurring as a result of intoxicated drivers and/or pedestrians.

Missouri law enforcement agencies and other traffic safety authorities take special precautions aimed at reducing holiday traffic crash levels, as well as their severity. Law enforcement agencies direct their forces to those roadways having inordinate amounts of holiday traffic. Some agencies set up special programs, such as arranging to have intoxicated persons driven home to prevent them from driving while intoxicated. Many law enforcement agencies and other traffic safety authorities conduct media campaigns to alert the public to the increased driving hazards they may experience over the holidays.

The intent of this report is to provide these traffic safety authorities with baseline information about Missouri's holiday traffic crash experience. This information can be used to develop more effective holiday traffic safety countermeasure programs.

Data used in this study were obtained from the Missouri Statewide Traffic Accident Records System (STARS). In accordance with State statute, law enforcement agencies are required to investigate traffic crashes occurring on public roadways if they involve death or personal injury or property damage over \$500.00. The results of their investigation are entered on uniform traffic accident report forms and forwarded to the Missouri State Highway Patrol (MSHP) Traffic Division. Staff from the MSHP Traffic Division encode data from these reports to computerized files. These files are made available to the MSHP Statistical Analysis Center (SAC) to conduct this analysis.

The findings from this study are described in the following three sections. The first section displays the 2007 Missouri Holiday Traffic Safety Clock. This clock offers an overview of the frequency of deaths and injuries caused by holiday traffic crashes over time. The second section presents data on Missouri's traffic crashes related to specific holidays. Holidays addressed in this section are:

- Memorial Day
- Fourth of July
- Labor Day
- Thanksgiving
- Christmas
- New Year

The last section provides summary data on the 2007 holiday traffic crashes in all counties and cities with populations of 1,000 or more in the State of Missouri.

1.0 MISSOURI HOLIDAY TRAFFIC SAFETY PERSONAL INJURY PROBLEM ANALYSIS CLOCK

THIS CLOCK SUMMARIZES PERSONS KILLED AND INJURED IN TRAFFIC CRASHES
IN THE STATE OF MISSOURI DURING 2007 HOLIDAYS IN RELATION TO TIME. THIS
CLOCK SHOULD BE VIEWED WITH CARE. THIS MODE OF DISPLAY SHOULD NOT BE
TAKEN TO IMPLY A REGULARITY IN THE OCCURRENCE OF DEATHS AND INJURIES IN
HOLIDAY TRAFFIC CRASH ACTIVITY; RATHER, IT REPRESENTS THE RATIO OF DEATHS
AND PERSONAL INJURIES TO HOLIDAY TIME INTERVALS.

MISSOURI HOLIDAY TRAFFIC SAFETY PERSONAL INJURY PROBLEM ANALYSIS CLOCK

2007

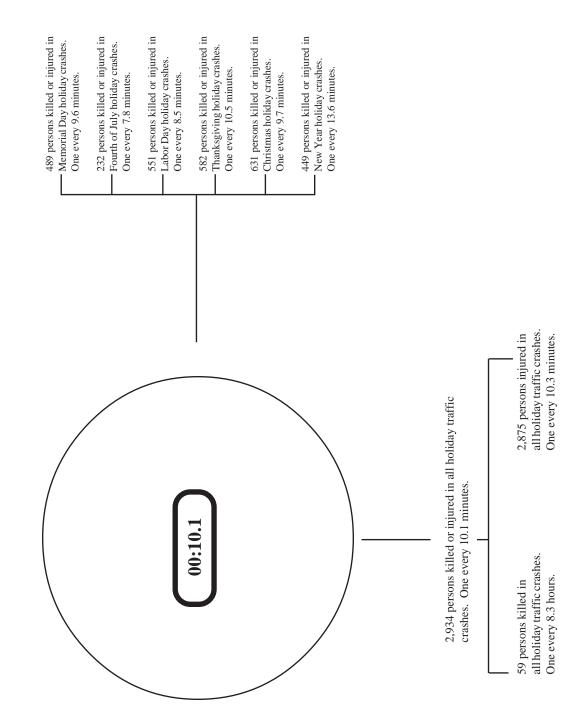

FIGURE 1.0.1

2.0 MISSOURI DETAIL HOLIDAY CRASHES PROBLEM ANALYSIS

A SERIES OF TABLES AND FIGURES SUMMARIZES MISSOURI'S HOLIDAY CRASH EXPERIENCE INCLUDING A DESCRIPTION OF CHARACTERISTICS AND CAUSAL FACTORS WHICH MAY HAVE CONTRIBUTED TO THE FREQUENCY AND/OR SEVERITY OF THESE CRASHES. DETAIL ANALYSIS IS PROVIDED FOR THE FOLLOWING SPECIFIC HOLIDAYS:

- MEMORIAL DAY
- FOURTH OF JULY
- LABOR DAY
- THANKSGIVING
- CHRISTMAS
- NEW YEAR

This section presents a series of data displays which describe Missouri's traffic crash experience over the Memorial Day holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2003 2007), 64 persons have been killed and 2,802 have been injured in traffic crashes on Missouri roadways over Memorial Day holidays.
- Over the 2007 Memorial Day holiday, Missouri had 1,094 traffic crashes. In these crashes, 15 persons were killed and 474 were injured.
- Over the 2007 Memorial Day holiday, one person was killed or injured every 9.6 minutes.
- Of all 2007 Memorial Day holiday traffic crashes, the first harmful event in 48.7% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 31.2% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2007 Memorial Day holiday traffic crashes, 60.5% occurred in an urban area and 39.5% occurred in a rural area of the State. Of all 2007 fatal Memorial Day traffic crashes, 72.7% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 11.1% of all traffic crashes over the 2007 Memorial Day holiday. However, it was a contributing circumstance in 17.5% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 24.2% of all traffic crashes occurring over the 2007 Memorial Day holiday. However, it was a contributing circumstance in 31.6% of the fatal and personal injury crashes.
- Of the fourteen occupants killed in automobiles, trucks, vans, or motor homes (vehicles normally having safety restraint devices), the restraint device was used in six cases and not used in eight cases.

¹This table identifies the percentage of Memorial Day holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2007 Missouri fatal and personal injury Memorial Day holiday crashes, it was found that in 31.6% of the crashes one or more drivers were speeding. In all Memorial Day holiday traffic crashes, 24.2% had one or more drivers who were speeding.

 $^{^{1}}$ Percentage is based on Memorial Day holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

TABLE 2.1.15

This section presents a series of data displays which describe Missouri's traffic crash experience over the Fourth of July holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2003 2007), 56 persons have been killed and 2,983 have been injured in traffic crashes on Missouri roadways over Fourth of July holidays.
- Over the 2007 Fourth of July holiday, Missouri had 426 traffic crashes. In these crashes, 2 persons were killed and 230 were injured.
- Over the 2007 Fourth of July holiday, one person was killed or injured every 7.8 minutes.
- Of all 2007 Fourth of July holiday traffic crashes, the first harmful event in 54.2% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 21.6% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2007 Fourth of July holiday traffic crashes, 62.7% occurred in an urban area and 37.3% occurred in a rural area of the State.
- Drinking by drivers and pedestrians was a contributing circumstance in 9.6% of all traffic crashes over the 2007 Fourth of July holiday. However, it was a contributing circumstance in 15.5% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 16.2% of all traffic crashes occurring over the 2007 Fourth of July holiday. However, it was a contributing circumstance in 21.8% of the fatal and personal injury crashes.
- Of the two occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices), the restraint device was used in one case and not used in one case.

¹This table identifies the percentage of Fourth of July holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2007 Missouri fatal and personal injury Fourth of July holiday crashes, it was found that in 21.8% of the crashes one or more drivers were speeding. In all Fourth of July holiday traffic crashes, 16.2% had one or more drivers who were speeding.

 1 Percentage is based on Fourth of July holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

TABLE 2.2.15

This section presents a series of data displays which describe Missouri's traffic crash experience over the Labor Day holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2003 2007), 77 persons have been killed and 2,769 have been injured in traffic crashes on Missouri roadways over Labor Day holidays.
- Over the 2007 Labor Day holiday, Missouri had 1,107 traffic crashes. In these crashes, 14 persons were killed and 537 were injured.
- Over the 2007 Labor Day holiday, one person was killed or injured every 8.5 minutes.
- Of all 2007 Labor Day holiday traffic crashes, the first harmful event in 58.7% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 24.4% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2007 Labor Day holiday traffic crashes, 59.5% occurred in an urban area and 40.5% occurred in a rural area of the State. However, in 2007 fatal Labor Day traffic crashes, 76.9% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 10.1% of all traffic crashes over the 2007 Labor Day holiday. However, it was a contributing circumstance in 16.2% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 16.4% of all traffic crashes occurring over the 2007 Labor Day holiday. However, it was a contributing circumstance in 27.2% of the fatal and personal injury crashes.
- Of the eleven occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices) none were using a restraint device, ten were not using a device, and the restraint device usage of the remaining one was not known.

¹This table identifies the percentage of Labor Day holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2007 Missouri fatal and personal injury Labor Day holiday crashes, it was found that in 27.2% of the crashes one or more drivers were speeding. In all Labor Day holiday traffic crashes, 16.4% had one or more drivers who were speeding.

 1 Percentage is based on Labor Day holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

TABLE 2.3.15

This section presents a series of data displays which describe Missouri's traffic crash experience over the Thanksgiving holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2003 2007), 78 persons have been killed and 2,957 have been injured in traffic crashes on Missouri roadways over Thanksgiving holidays.
- Over the 2007 Thanksgiving holiday, Missouri had 1,572 traffic crashes. In these crashes, 10 persons were killed and 572 were injured.
- Over the 2007 Thanksgiving holiday, one person was killed or injured every 10.5 minutes.
- Of all 2007 Thanksgiving holiday traffic crashes, the first harmful event in 53.7% of the incidents involved one motor vehicle in transport striking another motor vehicle in transport. In 27.7% of the cases, the first harmful event involved a motor vehicle striking a fixed object.
- Of all 2007 Thanksgiving holiday traffic crashes, 60.7% occurred in an urban area and 39.3% occurred in a rural area of the State. However, in 2007 fatal Thanksgiving traffic crashes, 71.4% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 6.5% of all traffic crashes over the 2007 Thanksgiving holiday. However, it was a contributing circumstance in 10.6% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 27.1% of all traffic crashes occurring over the 2007 Thanksgiving holiday. However, it was a contributing circumstance in 33.9% of the fatal and personal injury crashes.
- Of the ten occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices), the restraint device was used in five cases. In four cases, the occupant was not using a restraint device and in the remaining one case, the restraint device usage was unknown.

¹This table identifies the percentage of Thanksgiving holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2007 Missouri fatal and personal injury Thanksgiving holiday crashes, it was found that in 33.9% of the crashes one or more drivers were speeding. In all Thanksgiving holiday traffic crashes, 27.1% had one or more drivers who were speeding.

 $^{^{1}}$ Percentage is based on Thanksgiving holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

TABLE 2.4.15

2.5 CHRISTMAS HOLIDAY CRASHES

This section presents a series of data displays which describe Missouri's traffic crash experience over the Christmas holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2003 2007), 40 persons have been killed and 2,278 have been injured in traffic crashes on Missouri roadways over Christmas holidays.
- Over the 2007 Christmas holiday, Missouri had 1,857 traffic crashes. In these crashes, 8 persons were killed and 623 were injured.
- Over the 2007 Christmas holiday, one person was killed or injured every 9.7 minutes.
- Of all 2007 Christmas holiday traffic crashes, the first harmful event in 52.0% of the incidents involved
 one motor vehicle in transport striking another motor vehicle in transport. In 29.9% of the cases, the
 first harmful event involved a motor vehicle striking a fixed object.
- Of all 2007 Christmas holiday traffic crashes, 61.9% occurred in an urban area and 38.1% occurred in a rural area of the State. However, 62.5% of the 2007 fatal Christmas traffic crashes occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 6.3% of all traffic crashes over the 2007 Christmas holiday. However, it was a contributing circumstance in 10.8% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 37.0% of all traffic crashes occurring over the 2007 Christmas holiday. However, it was a contributing circumstance in 40.3% of the fatal and personal injury crashes.
- Of the eight occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices), the restraint device was used in two cases and not used in six cases.

¹This table identifies the percentage of Christmas holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2007 Missouri fatal and personal injury Christmas holiday crashes, it was found that in 40.3% of the crashes one or more drivers were speeding. In all Christmas holiday traffic crashes, 37.0% had one or more drivers who were speeding.

 $^{^{1}}$ Percentage is based on Christmas holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 1.0% or more of these crashes are listed.

TABLE 2.5.15

This section presents a series of data displays which describe Missouri's traffic crash experience over the New Year holiday. Data displays also are presented which identify characteristics of the vehicle and drivers involved in these incidents.

SUMMARY OF ANALYSIS

- Over the past five years (2003 2007), 50 persons have been killed and 2,477 have been injured in traffic crashes on Missouri roadways over New Year holidays.
- Over the 2007 New Year holiday, Missouri had 1,195 traffic crashes. In these crashes, 10 persons were killed and 439 were injured.
- Over the 2007 New Year holiday, one person was killed or injured every 13.6 minutes.
- Of all 2007 New Year holiday traffic crashes, the first harmful event in 54.0% of the incidents involved
 one motor vehicle in transport striking another motor vehicle in transport. In 26.1% of the cases, the
 first harmful event involved a motor vehicle striking a fixed object.
- Of all 2007 New Year holiday traffic crashes, 64.0% occurred in an urban area and 36.0% occurred in a rural area of the State. However, in fatal New Year holiday crashes, 60.0% occurred in a rural area.
- Drinking by drivers and pedestrians was a contributing circumstance in 8.0% of all traffic crashes over the 2007 New Year holiday. However, it was a contributing circumstance in 16.8% of the fatal and personal injury crashes.
- Speeding by drivers was a contributing circumstance in 20.8% of all traffic crashes occurring over the 2007 New Year holiday. However, it was a contributing circumstance in 24.1% of the fatal and personal injury crashes.
- Of the seven occupants killed in automobiles, trucks, vans, and motor homes (vehicles normally having safety restraint devices), the restraint device was not used in any of the cases.

¹This table identifies the percentage of New Year holiday crashes having a specific type of circumstance which contributed to the cause of the crash. For instance, when examining speed involvement in 2007 Missouri fatal and personal injury New Year holiday crashes, it was found that in 24.1% of the crashes one or more drivers were speeding. In all New Year holiday traffic crashes, 20.8% had one or more drivers who were speeding.

 $^{^{1}}$ Percentage is based on New Year holiday crashes which occurred in Missouri municipalities with populations of 1,000 or more. Only those municipalities comprising 0.5% or more of these crashes are listed.

TABLE 2.6.15

3.0 MISSOURI COUNTY AND CITY HOLIDAY CRASH ANALYSIS

A SERIES OF TABLES SUMMARIZES 2007 HOLIDAY CRASH ACTIVITY ASSOCIATED WITH ALL COUNTIES, AS WELL AS ALL CITIES HAVING POPULATIONS OF 1,000 OR MORE IN THE STATE OF MISSOURI. PLEASE NOTE THAT ALL 2007 HOLIDAY CRASHES OCCURRING IN A GIVEN COMMUNITY ARE DISPLAYED REGARDLESS OF THE LAW ENFORCEMENT AGENCY THAT INVESTIGATED THE TRAFFIC CRASH.

¹ All traffic crash activity occurring in a county and cities within a county is presented in this data display. A note of caution is warranted for cities whose jurisdictional boundaries cover more than one county. For City A whose boundaries fall in County A and County B - County A's portion of the data display will have County A City A's traffic crash activity presented. County B's portion of the data display will have County B City A's traffic crash activity presented. Those cities falling in more than one county can be identified by their name being followed by a slash (/) and the first three letters of the county name (e.g., Kansas City / JAC). Table 3.0.2 is presented to identify the total crash activity of these multi-county cities.

¹ All traffic crash activity occurring in cities having jurisdictional boundaries in more than one county is presented in this data display. The total crash activity for each multi-county city is presented in this display.

TABLE 3.0.2

GLOSSARY

CHRISTMAS: The holiday which falls on December 25th.

FATAL TRAFFIC CRASH: A crash in which one or more persons were killed as a result of the crash and their death(s) occurred within 30 days of the incident.

FOURTH OF JULY: The holiday which falls on July 4th.

HOLIDAY COUNTING PERIOD: Periods set by the National Safety Council for purposes of counting holiday traffic crashes in the Nation.

LABOR DAY: The holiday which falls on the first Monday in September.

MEMORIAL DAY: The holiday which falls on the last Monday of May.

NEW YEAR: The holiday which falls on January 1st.

PERSONAL INJURY TRAFFIC CRASH: Any crash in which no person was killed but one or more persons were injured in the incident.

PROPERTY DAMAGE TRAFFIC CRASH: Any crash in which no person was killed or injured but property was damaged in the incident.

QUARTILE: The value that marks the boundary between two consecutive intervals in a frequency distribution of four intervals with each containing one quarter of the total population.

RURAL AREA: Any community of less than 5,000 population or an unincorporated area of the State.

THANKSGIVING: The holiday which falls on the fourth Thursday in November.

URBAN AREA: Any community in the State having a population of 5,000 or more.
