

# Missouri Boating Statistics & Drownings

**2020  
Edition**  

---

**2019  
Statistics**

**Department of Public Safety  
Missouri State Highway Patrol**

# Introduction

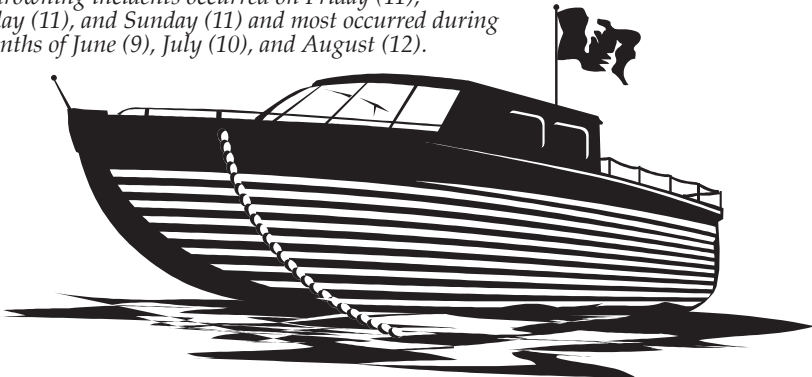

This booklet is published by the Missouri State Highway Patrol as an aid to persons who are interested in recreational boating crashes and accidental drowning incidents occurring in the state. It contains information which provides a comprehensive look at statewide crashes and accidental drowning incidents as experienced in 2019.

The Missouri State Highway Patrol is the central recreational boating data collection agency for the State of Missouri. The Patrol investigates all recreational boating crashes occurring in the state and either investigates or gathers data on accidental drowning incidents occurring in state and private waters.

## Interesting Statistics

*Here at a glance are some interesting statistics found in this booklet:*

- *In 2019 there were 18 persons killed and 104 persons injured in recreational boating crashes in the state of Missouri. This was two more killed and three more injured than in 2018. There was an decrease of 4.6% in total crashes statewide (165) compared to 2018 (173).*
- *In 2019 there were 165 total crashes including 75 property damage only, 72 injury, and 18 fatal.*
- *“Inexperience of operator” was the leading contributing circumstance for all crashes followed by “water conditions (rough, chop, current, etc).” “Impairment (alcohol/drugs)” was known to have been a contributing circumstance to 16 crashes statewide.*
- *“Falls overboard” crashes resulted in the deaths of three persons. This was 16.7% of the total persons killed in crashes.*
- *Of all crashes reported statewide, 76.4% (126) occurred during the months of May through August.*
- *Most crashes occurred on Saturday (57) and Sunday (36) and most (116) occurred between noon and 8:00 p.m.*
- *Of all crashes reported statewide, 77% (127) involved only one watercraft. Sixteen of the eighteen fatal crashes involved only one watercraft.*
- *Of the 187 boat operators involved in crashes, 94 had no prior boater education.*
- *In 2019, there were 42 persons killed in accidental drowning incidents occurring in state waters, 14 more than in 2018. The Missouri State Highway Patrol also investigated 13 accidental drowning incidents that occurred on private property and an additional seven that were flood related/other.*
- *Most drowning incidents occurred on Friday (11), Saturday (11), and Sunday (11) and most occurred during the months of June (9), July (10), and August (12).*

*It is hoped that the information in this booklet will be of value to you. Certainly it is the most comprehensive look available at statewide crashes and accidental drowning incidents in Missouri.*

# Alcohol Involvement

**Drinking and Crashes** - Whether or not a person has been drinking cannot always be determined at the scene of a crash. Because of the time lapse from the moment of occurrence until an officer arrives at the scene to make the investigation, a person's condition concerning drinking can change a great deal. In cases where the individual may have been removed to a hospital, doctor's office or funeral home, his/her condition may never be determined.
