

Classification: Computer Information Technology Specialist (CITS) II
Server Support Unit

Title Code: V08005

Pay Range: 33

POSITION SUMMARY:

This is advanced professional, technical, and consultative work in the support and coordination of computer information technology services and activities. An employee in this class provides advanced technical expertise in the administrations of server software and server infrastructure. The position will serve as a lead on server support projects and often serve as a mentor to other staff members within the server support unit. Work generally focuses on the implementation and support of the server infrastructure, operating systems and server related applications. Work includes conducting feasibility and impact studies of technology direction and providing recommendations. Duties may also include implementation of recommendations, project management and/or provision of technical consultative services. Work is performed under general supervision; however, the employee is expected to exercise initiative and independence in the performance of assigned responsibilities.

DESCRIPTION OF DUTIES PERFORMED:

(Any one position may not include all of the duties listed nor do the listed examples include all tasks which may be found in positions of this class.)

Administration of Windows, Linux and Advanced Interactive eXecutive (AIX) servers including capacity planning, monitoring, troubleshooting and tuning.

Design and administration of virtual environments such as VMware and Hyper V to create, modify and implement virtual servers, the development of and management of virtual desktop environments.

Storage administration, space management, capacity forecasting, asset and performance management, equipment life cycle management, and troubleshooting.

Design and administration of server system applications including Active Directory, Domain Name Servers (DNS), Exchange, Content Manager, Lotus Notes, SharePoint, Team Foundation Server, WebSphere, MSSQL, IIS and various other applications.

Design and administration of server and storage hardware/technology such as blade centers, network attached storage, Internet Small Computer System Interface (iSCSI), Fibre Channel, storage area networks and storage virtualization.

Design and administration of backup and disaster recovery solutions such as Data Domains, SRM, and SDN.

Design and administration of security and monitoring applications for the server and storage infrastructure.

Documents, reviews and updates server support policies and procedures for MSHP by reviewing, interpreting and applying industry standards.

Leads server support related projects.

Mentor other staff members within the server support unit.

Performs other related work as assigned.

Classification: Computer Information Technology Specialist (CITS) II
Server Support Unit

REQUIRED KNOWLEDGE, SKILLS, AND ABILITIES:

Considerable knowledge of the principles of computer programming and systems analysis, design, testing, and documentation.

Considerable knowledge of the general operating principles and capabilities of computer hardware and software.

Considerable knowledge of or ability to learn the Criminal Justice Information Services (CJIS) Security Policy.

Considerable knowledge of or ability to learn the MULES system as it relates to the technical connectivity and CJIS requirements.

Considerable knowledge of software reference libraries and related utility programs.

Considerable knowledge of computer security systems and procedures.

Considerable knowledge of computer networking and telecommunications.

Considerable knowledge of computer operating systems.

Considerable knowledge of database management systems.

Working knowledge of or ability to learn the agency's automated information systems.

Working knowledge of or ability to learn the agency's functions and their interrelationships.

Working knowledge of the principles of cost benefit analysis.

Working knowledge of the principles of project management.

Working knowledge of the principles of disaster recovery.

Working knowledge of the procurement process.

Working knowledge of continuing trends and developments in computer hardware and software.

Working knowledge of various computer platforms.

Working knowledge of the information strategic planning process.

Working knowledge of the systems management process.

Working knowledge of the principals of information system audits and security testing.

Possess good organizational skills.

Possess research and analysis skills.

Ability to utilize project management tools.
